INTERNATIONAL MASTERS GAMES ASSOCIATION

REQUEST FOR PROPOSAL

Technology Provider for IMGA Masters Events

Issued by the International Masters Games Association (IMGA), Lausanne, Switzerland.

1. Introduction

The International Masters Games Association (IMGA) invites proposals from qualified Technology Providers to develop and support a comprehensive Games Management System (GMS) for IMGA Masters Events worldwide. The system must be scalable, modular, and adaptable to serve events ranging from 1,000 to 50,000+ participants and from 5 to 40+ sports.

IMGA Masters Events promote lifelong participation in sport for athletes aged 25 years and older. These events require an integrated technological solution that enhances efficiency, supports participant experience, and reflects the IMGA's values of friendship, health, and active living.

2. Purpose of this RFP

This Request for Proposal (RFP) seeks to identify a Technology Provider capable of delivering an end-to-end, scalable platform that supports IMGA Masters Events of varying size and scope. The solution should streamline Games operations, provide data continuity between editions, and enhance athlete and organiser experience.

3. Role of the Technology Provider

The Technology Provider will design, implement, and maintain the IMGA Games Management System (GMS). The solution must be accessible via mobile app, web, and desktop, providing seamless management for athletes, organisers, officials, and volunteers.

4. List of Services

- Development and hosting of a Centralised Games Management System (CGMS).
- Registration and sport entries for all participant groups.
- Accreditation and credentialing system with secure photo upload and cropping.
- Competition and results management modules with real-time results publishing.
- Integrated communication tools for participants and administrators.
- Payment and invoicing system supporting multiple currencies and payment types.
- Data analytics and customisable reporting tools.
- Partner Finder and team formation features.
- Corporate and sponsor team registration via special codes.
- Quota management to regulate local/international participation ratios.
- Promo code functionality for marketing and sponsorship campaigns.
- Document upload and verification for eligibility checks.

- High-performing, reliable, and secure hosting.
- Modular scalability for events featuring 5 to 40+ sports.

5. Centralised Games Management System Deliverables

- Cross-platform functionality via app, mobile, and desktop.
- Configurable registration and payment settings by event and sport.
- Multi-language interface with expansion capability.
- Accreditation photo upload and crop tools.
- Quota and waiting list management modules.
- Integrated payment gateway with multiple methods and currencies.
- Real-time results publication and downloadable reports.
- Mandatory Terms & Conditions acceptance upon registration.
- Advanced reporting and data query tools.
- OTP - based account validation via email and SMS.
- Best practice UI and UX design.
- Team and corporate payment workflows.
- Scalable and modular design for multi-event flexibility.

6. Enhanced Functional Capabilities (Recommended but not required)

- Future Integration with IMGA Online Community Platform - Open architecture for secure single sign-on (SSO), profile synchronisation, results sharing, and ongoing engagement post-Games.
- Health and Medical Declarations Module - Upload and manage medical waivers or health clearance per sport; optional integration with insurance verification.
- Accommodation, Transport, and Tourism Integration - Optional dashboard for hotel booking, transport passes, and tourism offers via host city APIs.
- Athlete Experience and Legacy Tracking - Long-term tracking of athlete participation, results, and engagement across IMGA events.
- Volunteer and Workforce Management - Registration, accreditation, scheduling, and communications for volunteers and staff.
- Sustainability and CSR Tracking - Optional module for reporting eco-friendly actions and Games sustainability performance.
- Data Continuity Between Games Editions - Architecture allowing IMGA and future LOCs to reuse data and maintain continuity across events.

7. Pricing Proposal

Vendors must provide a scalable pricing structure aligned with event size and complexity. Suggested tiers include:

- Small events - up to 1,000 athletes
- Medium events - up to 10,000 athletes
- Large events - 50,000+ athletes

Pricing should include implementation, hosting, maintenance, and optional modules, with flexibility for events involving 5 - 40+ sports.

8. Evaluation Criteria

Proposals will be evaluated based on the following criteria:

- Technical capacity, scalability, and flexibility of the proposed system.
- Proven experience in multi-sport or large-scale event technology.
- Compliance with international data protection standards (e.g., GDPR, ISO 27001).
- System usability and user experience design.
- Implementation approach and post-launch support capabilities.
- Value and long-term sustainability of pricing.
- Supplier's understanding of Masters sport culture, participant motivations, and operational specificities unique to IMGA events.

9. Response Format and Submission Details

Submissions must include:

1. Company profile and contacts.
2. Overview of proposed technology solution.
3. Experience with similar multi-sport or lifestyle events.
4. Hosting, data security, and back-up architecture.
5. Implementation plan and team structure.
6. Maintenance and support processes.
7. Full pricing proposal.
8. References from comparable projects.

Proposals should be submitted electronically to the IMGA Administration (JVH@IMGA.CH) by the stated deadline.
