WORLD MASTERS SPORT

REQUEST FOR PROPOSAL · COMO LAKE 2027

TURNKEY REGISTRATION AND GAMES MANAGEMENT SOFTWARE

For OC-operated delivery of Open Masters Games Como Lake 2027

REGISTRATION OPENS 17 SEPTEMBER 2026

GAMES 17-26 SEPTEMBER 2027 · COMO · LECCO · VARESE

ISSUE DATE · 27 AUGUST 2026 | VERSION 1.3

ISSUED BY WORLD MASTERS SPORT

Software provided to the Como Lake 2027 Organising Committee for event operation

SINGLE-EVENT PROCUREMENT · SPORT WITHOUT LIMITS.

PROCUREMENT NOTICE

CRITICAL LAUNCH CONSTRAINT The athlete registration service must be live, secure, tested and supported in production on 17 September 2026. World Masters Sport therefore seeks a proven, configurable software service that it can provide to the Organising Committee for event operation. Bespoke development may not sit on the critical path to registration launch.

ITEM	PROCUREMENT POSITION
Issuer / contracting customer	World Masters Sport, the operating name of the International Masters Games Association, Avenue de Rhodanie 54, 1007 Lausanne, Switzerland. WMS will provide the accepted software service to the Como Lake 2027 Organising Committee.
Operational user	The Organising Committee and its authorised delivery teams. The OC remains responsible for event operations.
Contract scope	One turnkey software solution for Open Masters Games Como Lake 2027 only, from mobilisation through post-Games exit.
Host geography	The event spans the provinces and host cities of Como, Lecco and Varese in Lombardy, Italy.
Planning scale	Approximately 14,000 athletes expected; an evolving programme of around 30+ sports, including para disciplines, across a multi-venue footprint.
Production launch	17 September 2026 for athlete registration, at the time notified by World Masters Sport in consultation with the Organising Committee.
Games period	17-26 September 2027, with protected operational windows before and after the Games.
Contract horizon	Anticipated from award through 31 December 2027, including data export, retention and transition obligations.
Response language	English. Product interfaces must support English and Italian at launch.

DEFINITIONS USED IN THIS RFP

World Masters Sport (WMS) / Authority. the issuer of this RFP, contracting customer and provider of the Solution to the Organising Committee for Como Lake 2027.

Organising Committee (OC). the authorised operational user of the Solution, responsible for event operations, operational staffing, sport and venue processes, participant administration and business decisions.

Supplier. the successful software and managed-service provider contracted by WMS, including its approved subcontractors.

Solution. the hosted software, configured services, integrations, support, people, processes and deliverables supplied under the contract.

Core Service. athlete identity, registration, eligibility, payment, entry, team, accreditation, communication, data and operational administration capabilities.

Operations-ready. formally accepted by WMS and the OC as deployable and supportable in production: configured, integrated, tested, monitored, secured, documented, recoverable and governed, with trained OC users plus approved support runbooks and fallback procedures.

Protected Window. a period in which enhanced availability, support, change control and incident targets apply, including registration launch, entry deadlines, accreditation and Games operations.

Must / Should / May. mandatory requirement / materially preferred requirement / optional capability. A Supplier may identify a proposed alternative, but must state the impact.

TENDER CONDITIONS

1. WMS may amend, suspend or cancel this process; negotiate with one or more bidders; seek clarification; request demonstrations; and accept or reject any proposal without liability for bidder costs.
2. All bid preparation and demonstration costs are borne by the bidder. Proposals must remain valid for at least 30 days from the submission deadline.
3. The bidder must disclose conflicts of interest, subcontractors, hosting locations, material assumptions, exclusions and all deviations from this RFP.
4. This RFP is not an instruction to reuse or expose personal data from other Masters events. Any pre-registration or legacy data migration will occur only under an approved data-processing basis and migration plan.
5. This RFP, the procurement process and any resulting contract are governed by Swiss law. Any dispute concerning its validity, interpretation or performance shall be determined conclusively by arbitration, to the exclusion of the ordinary courts of Switzerland, the Host Country and any other country, and be decided by the Court of Arbitration for Sport in Lausanne (Switzerland) in accordance with the Code of Sports-Related Arbitration of the said Court. The arbitration shall take place in Lausanne, Switzerland.

CONTENTS

1. Event context, objectives and planning assumptions
2. Scope of the turnkey software service
3. Masters sport operating model and rule requirements
4. Functional requirements
5. Non-functional, data, privacy, security and accessibility requirements
6. Delivery approach, milestones and acceptance
7. Operations-ready service-level agreement
8. Commercial and contractual requirements
9. Evaluation, demonstrations and award
10. Bid response and submission instructions

Appendix A. Required compliance and pricing schedules

Appendix B. SLA response schedule

Appendix C. Research basis and governing references

1. EVENT CONTEXT, OBJECTIVES AND PLANNING ASSUMPTIONS

1.1 EVENT CONTEXT

Open Masters Games Como Lake 2027 is an international multi-sport event for Masters athletes, staged from 17 to 26 September 2027 across Como, Lecco and Varese. Participants enter as athletes and teams rather than national delegations, and the programme is intended to welcome mature athletes across a wide range of ages, abilities and disciplines.

WMS is procuring the hosted software service and will provide it to the OC. The OC will operate the event through the Solution using its own operational teams and authorised delivery partners. The Supplier is responsible for software delivery, readiness, hosting, support and service continuity; it is not being appointed to run the Games.

The public sport programme and sport guides are still evolving. Published materials currently show different age thresholds, calculation methods, proficiency definitions and eligibility evidence by sport. The Solution must therefore treat all sport rules as controlled configuration with effective dates, approvals and a complete audit trail- not as a single global age formula or static registration form.

1.2 PROCUREMENT OBJECTIVES

1. Open athlete registration on 17 September 2026 without compromising security, accessibility, payment integrity or operational support.
2. Provide one coherent participant journey across account creation, sport entry, team formation, eligibility, documents, payment, accreditation, communications and results.
3. Give the OC and each authorised sport/venue team real-time operational control through role-based dashboards, workflows and exports, under WMS service governance.
4. Correctly model the specificities of Masters sport, including age calculations, ability grades, team/crew rules, handicap, classification, licences and medical evidence.
5. Operate reliably through launch peaks, entry deadlines, accreditation and the ten-day Games period with rehearsed incident, continuity and fallback arrangements.
6. Protect participant data and give WMS and the OC usable, documented, portable data at contract exit, subject to the agreed controller/processor allocation.

1.3 PLANNING ASSUMPTIONS AND MINIMUM DESIGN ENVELOPE

Bidders must size and price the Solution against the following baseline. These values are capacity requirements, not guarantees of registration volume.

DIMENSION	BASELINE FOR DESIGN AND PRICING
Paid athletes	14,000 expected; service to support at least 20,000 without re-platforming.
User and related records	At least 50,000 athlete, team contact, companion, workforce and stakeholder records.
Sport programme	At least 40 configurable sports/discipline groups, including para classes and late programme changes.
Venues and competition units	At least 75 venues and 150 independently schedulable events/competition units.
Registration launch load	At least 2,000 concurrent authenticated sessions and a demonstrated five-times-normal transaction burst, with no overselling of quotas.
Languages	English and Italian in production; architecture must allow additional languages without code changes.
Currencies and payments	EUR settlement, international card acceptance and configurable additional payment methods.
Data retention	Operational access through 31 December 2027 plus contractually agreed export, deletion and statutory retention periods.

PROGRAMME VARIABILITY Public sources are not fully aligned on final sport and venue counts. The Supplier must show that sports, categories, venues, prices, quotas and rules can be added or changed through controlled configuration without outage or a software release.

2. SCOPE OF THE TURNKEY SOFTWARE SERVICE

2.1 DELIVERY AND OPERATING MODEL

The Supplier will act as prime contractor for the software service. In this RFP, 'turnkey' applies to end-to-end software delivery and service outcomes - configuration, hosting, licences, integrations, migration, testing, documentation, training, monitoring, technical support, incident management, software-vendor coordination and exit. It does not transfer responsibility for operating the Games from the OC to the Supplier.

PARTY	ACCOUNTABILITY IN THE OPERATING MODEL
World Masters Sport	Issues and governs the procurement; contracts with and manages the Supplier; provides the accepted Solution to the OC; approves material scope, service, data-governance and contractual decisions.
Organising Committee	Operates registration and event workflows; supplies operational staff and subject-matter owners; approves sport rules, fees and participant decisions; runs venues, accreditation desks, helpdesk and manual fallbacks.
Supplier	Delivers, configures, hosts and supports the software; trains OC users; monitors the service; resolves incidents; maintains recovery and technical runbooks; provides Games-time software-service coverage.

RESPONSIBILITY BOUNDARY The OC owns event operations and business decisions. The Supplier must make those operations possible through reliable software, training, tooling, documentation and technical support. Any optional operational services must be separately identified and are not part of the mandatory base scope.

2.2 SERVICES IN SCOPE

1. Public and assisted athlete registration; account, identity and consent management; individual, pair, team, crew and relay entries.
2. Configurable Masters eligibility and classification rules; evidence collection, verification, exception and appeal workflows.
3. Fees, orders, secure payment, invoicing/receipting, refunds, chargebacks, promo codes, group/corporate payment and financial reconciliation.
4. Quotas, waiting lists, release waves, inventory/slot controls and demand dashboards at sport, discipline, event, category and venue level.
5. Team formation, invitations, roster management, partner finder, captain/manager tools, substitutions and roster locks.
6. Accreditation and credential lifecycle, including photo, role/entitlement, print/export interface, issue/reissue and audit trail.
7. Competition data exchange, schedules, start lists, results, medal/ranking outputs and publication, either natively or through supported sport-specific integrations.
8. Targeted multilingual email/SMS/in-app communications, templates, operational alerts and delivery reporting.
9. Administration, reporting, dashboards, data exports, APIs/webhooks, support tooling and complete audit logs.
10. Implementation, production cutover, operational readiness, technical support for OC-led live operations, post-event closure and secure transition/exit.

2.3 INTERFACES AND CHANNELS

1. Responsive participant web experience optimised for mobile, tablet and desktop. A native mobile app may be proposed but is not a substitute for an accessible browser journey.
2. Role-based administrator portal for OC, sport, finance, accreditation, helpdesk, venue and reporting users.
3. Documented APIs, webhooks and secure file exchange for the event website, payment service provider, CRM/community services, access control/credential printing, competition systems, accommodation/tourism partners and analytics.
4. Supported assisted-registration workflow for the helpdesk and authorised proxies, with participant consent and explicit audit logging.

2.4 SCOPE BOUNDARIES

The mandatory scope excludes event-management and operational staffing: participant helpdesk agents, sport operations, venue management, accreditation-desk operators, competition officials, communications approval, finance decision-making and execution of OC business procedures remain with the OC. Also excluded unless expressly proposed are venue internet circuits; field-of-play timing/scoring hardware; generic event-website content management; physical credential printers and consumables; and accommodation inventory. The Supplier remains responsible for specifying software dependencies, validating interfaces and enabling monitored fallback processes for every integration on which the Core Service depends.

3. MASTERS SPORT OPERATING MODEL AND RULE REQUIREMENTS

3.1 REQUIRED RULES-ENGINE CHARACTERISTICS

RUL-01 Rules must be configurable by sport, discipline, event, gender/category, team type, competition grade, venue, phase and effective date.

RUL-02 Age must be calculated against a configurable reference date (for many current Como guides, 31 December 2027), not simply the registration date or Games opening date.

RUL-03 A rule change must trigger impact analysis: affected registrations, teams, fees, quotas, documents, schedules and communications. No reclassification may occur silently.

RUL-04 The system must preserve the original registration category, current validated category, reason for any change, approving user and timestamp.

RUL-05 Rule versions and sport-guide versions must be publishable, exportable and auditable. Participants must be notified where a material rule change affects their entry.

RUL-06 Authorised administrators must be able to create exceptions with reason codes and dual approval for high-impact changes.

3.2 MASTERS-SPECIFIC CLASSIFICATION PATTERNS TO SUPPORT

PATTERN	CURRENT COMO EXAMPLE	REQUIRED SYSTEM BEHAVIOUR
Individual age bands	Swimming publishes five-year categories from 25+ through 100+; cycling uses five-year bands with upper open categories.	Derive category from date of birth and the sport reference date; support open-ended and irregular bands.
Youngest-member rule	Basketball and floorball use the youngest player to determine the team category; tennis uses the youngest doubles player.	Recalculate in real time when a roster changes; block or warn on invalid roster moves and preserve the prior decision.
Crew average age	Rowing calculates average crew age, excluding the coxswain.	Support inclusion/exclusion roles, decimal/rounding policy, substitute impact and category validation.
Relay aggregate age	Swimming relay bands use the sum of the four members' ages.	Calculate aggregate age, apply band rules and revalidate substitutions.

PATTERN	CURRENT COMO EXAMPLE	REQUIRED SYSTEM BEHAVIOUR
Proficiency grade	Badminton, basketball and volleyball publish competitive and recreational grades; tennis permits grade by event.	Capture self-declaration and evidence; allow sport review, re-grade, grade-specific fees/quotas and appeal.
Multiple dimensions	Judo combines age, weight, sex/category, federation status and minimum 1st Kyu grade.	Model multi-attribute eligibility, verification status, weigh-in changes and competition mapping.
Handicap	Golf offers gross and handicap Stableford formats and uses player handicap.	Capture issuing authority, index/value, validity, verification and event-specific use.
Para classification	Current swimming guidance includes S1-S13 classes and documentary evidence.	Capture class, class status, evidence, review/expiry, assistance/access needs and results-class mapping with restricted access.
Category combination	Sport guides permit low-entry categories to be combined while medals remain tied to original categories.	Support combined heats/fields without losing original award category, ranking or published explanation.
Eligibility exclusions	Some sports apply licence, recent elite/national-team or suspension exclusions.	Collect declarations/evidence, screen rules, route exceptions and retain the decision basis.

3.3 ELIGIBILITY EVIDENCE AND PARTICIPANT SAFETY

EVD-01 Configurable evidence may include date-of-birth ID, federation licence/membership, competition history, belt/grade, handicap, para class, medical fitness certificate, waiver, insurance and accreditation photo.

EVD-02 Each document type must support required/optional logic, sport applicability, issuing country, issue/expiry date, version, secure upload, malware scanning, reviewer status, rejection reason and participant resubmission.

EVD-03 Medical and disability/classification information must use privacy-by-design controls, least-privilege access, restricted exports, a recorded lawful basis and separate retention/deletion rules.

EVD-04 The OC must be able to define acceptable document formats and translations, waive a requirement with approval, and report outstanding/expired evidence without exposing unnecessary content.

3.4 TEAM, PAIR AND PARTNER JOURNEYS

TEA-01 Support captain-created teams, invite codes/links, individual join requests, managed team assignment, partner finder and OC-assisted matching.

TEA-02 Support team deposits, payer sponsorship, split payments, unpaid roster members, deadlines, minimum/maximum roster size, reserve roles, manager/coach roles and roster locks.

TEA-03 Apply age, grade, gender/category, nationality/residency (if used), licence and event-duplication rules at both member and team level.

TEA-04 Permit controlled substitutions after deadlines, with fee, refund, category and accreditation impacts recalculated before approval.

4. FUNCTIONAL REQUIREMENTS

Bidders must answer every requirement carrying an identifier in this RFP (RUL, EVD, TEA, PLT, REG, PAY, ACC, CMP, OPS, NFR, PRV, ACS, DAT, SEC and CON series) in Appendix A using: Comply-standard; Comply-configuration; Comply-third party; Partial; Roadmap; or Not available. Any qualification must include delivery date, dependency, cost and operational impact.

4.1 PLATFORM, IDENTITY AND PARTICIPANT EXPERIENCE

ID	PRIORITY	REQUIREMENT
PLT-01	Must	Provide a production-proven, hosted, responsive service for participant and administrator use on current major browsers and mobile devices.
PLT-02	Must	Provide English and Italian journeys, content, validation, emails and receipts at registration launch; allow authorised translation management and additional languages without code changes.
PLT-03	Must	Provide a single participant account with verified email and/or SMS, secure passwordless or password-based authentication, account recovery and duplicate-account handling.
PLT-04	Must	Enforce MFA for privileged users and configurable MFA/risk controls for participants; support role-based access and least privilege.
PLT-05	Must	Provide clear save-and-resume, review, correction and confirmation steps; preserve selections during payment retries or session interruption.
PLT-06	Must	Support assisted/proxy registration with recorded authority/consent and an audit trail distinguishing participant and operator actions.
PLT-07	Must	Provide participant self-service for profile, entries, teams, evidence, payments, invoices/receipts, communications, accreditation status and downloadable confirmations.
PLT-08	Should	Provide household or companion-linked profiles without commingling consent, credentials or sensitive evidence.

4.2 REGISTRATION, ENTRIES, TEAMS AND ELIGIBILITY

ID	PRIORITY	REQUIREMENT
REG-01	Must	Configure registration products and workflows by sport, discipline, event, age band, grade, team type, venue, phase and participant type.
REG-02	Must	Calculate age and category from date of birth using sport-specific reference dates, band definitions and open-ended categories.
REG-03	Must	Support youngest-member, average-age, aggregate-age and other formula-based team/crew/relay categories with immediate revalidation after roster changes.
REG-04	Must	Support proficiency/grade self-selection, evidence, automated screening, sport-admin review, re-grading and appeal with full audit.
REG-05	Must	Support sport-specific dimensions including weight, belt/grade, handicap, para classification, licence/membership, sex/gender category and event-specific eligibility/exclusions.
REG-06	Must	Support individual, pair, doubles, team, crew and relay entries, including captains, managers, reserves, substitutes and non-playing roles.
REG-07	Must	Support team invitations, join requests, partner finder, OC matching, team codes and controlled roster publication/privacy.
REG-08	Must	Enforce sport-specific minimum/maximum roster, event-entry limits, incompatible-event rules and deadlines; warn about provisional schedule conflicts.
REG-09	Must	Provide quotas, reserved allocations, release waves, local/international or other authorised quota dimensions, waitlists, automatic offers, expiry timers and oversell prevention.
REG-10	Must	Provide document/evidence collection with file validation, malware scanning, review queues, expiry, rejection/re-upload and reason codes.
REG-11	Must	Provide a configurable status lifecycle covering draft, pending evidence, pending team, pending payment, waitlisted, confirmed, cancelled, substituted, withdrawn and disqualified.
REG-12	Must	Support participant-initiated and administrator-initiated changes with fee/category/quota/document impacts shown before commitment and logged after approval.

ID	PRIORITY	REQUIREMENT
REG-13	Must	Import current pre-registration expressions of interest, deduplicate safely and issue invitation/claim-account journeys without treating pre-registration as a paid entry. WMS will confirm the current pre-registration record volume (currently 15000).
REG-14	Should	Support configurable add-ons such as ceremonies, transport, tourism, accommodation referrals, merchandise, insurance referral and companion products.
REG-15	Must	Provide real-time and exportable registration counts, funnels, abandoned carts, evidence backlog, waitlists, capacity, team completeness and exception queues.

4.3 FEES, PAYMENTS AND FINANCIAL CONTROL

ID	PRIORITY	REQUIREMENT
PAY-01	Must	Configure base fees, sport/event fees, add-ons, taxes/VAT treatment, early/late phases, participant types, waivers, promo codes, packages and price effective dates.
PAY-02	Must	Accept EUR and international cards using a PCI DSS-compliant payment model with Strong Customer Authentication/3-D Secure support; disclose settlement currencies and countries.
PAY-03	Must	Support individual, captain/team, corporate/sponsor and OC-comped payment workflows, including split or staged payments if proposed.
PAY-04	Must	Prevent duplicate charges; maintain idempotent orders/payment callbacks; reconcile payment, registration and gateway status automatically.
PAY-05	Must	Support full/partial refunds, cancellation policies, transfer/substitution adjustments, chargebacks, failed payments and manual exceptions with dual control.
PAY-06	Must	Issue configurable, sequential receipts/invoices/credit notes and export VAT/finance data. State support for Italian e-invoicing/FatturaPA/SDI where applicable.
PAY-07	Must	Provide daily settlement, fee, refund, tax, promo, unpaid and variance reports, with immutable audit of financial changes.
PAY-08	Must	Keep cardholder data out of OC systems wherever possible; tokenise payment references and define PCI responsibility boundaries.
PAY-09	Should	Support additional methods such as bank transfer, digital wallets or SEPA, including pending-payment reservation expiry and reconciliation.
PAY-10	Must	State the proposed payment operating model: merchant of record, payment service provider, acquirer, settlement flow and currencies, chargeback handling and the PCI DSS responsibility split between Supplier, WMS and the OC. Where more than one model is offered, identify the model priced in the proposal and all dependencies.

4.4 ACCREDITATION AND CREDENTIALS

ID	PRIORITY	REQUIREMENT
ACC-01	Must	Maintain one credential record linked to the authoritative participant/person record, with configurable role, sport, venue, zone, transport, catering and date/time entitlements.
ACC-02	Must	Provide secure photo upload, quality/crop controls, consent, rejection/re-upload and duplicate-photo review.
ACC-03	Must	Gate credential approval on configurable registration, payment, evidence, training and role conditions.
ACC-04	Must	Provide bulk and individual production exports/APIs, print status, collection, issue, reprint, revoke and replacement audit.

ID	PRIORITY	REQUIREMENT
ACC-05	Must	Support QR/barcode/NFC identifiers or integration with the selected credential/access system without exposing unnecessary personal data.
ACC-06	Must	Provide fast search and offline/fallback lookup packs for accreditation centres, with controlled reconciliation when service returns.
ACC-07	Should	Support appointment/arrival/check-in, kit or welcome-bag issue and signature/waiver confirmation.

4.5 COMPETITION, SCHEDULE AND RESULTS

ID	PRIORITY	REQUIREMENT
CMP-01	Must	Maintain the authoritative competition-entry dataset and export start-list/entry data by sport, category, grade, class, team and venue.
CMP-02	Must	Support native scheduling/results or monitored integrations with sport-specific systems; the bidder must identify the system of record for each data object.
CMP-03	Must	Support category combinations for competition while preserving original award categories, entrant lineage and published explanations.
CMP-04	Must	Support team/crew/relay roster locks and controlled Games-time substitutions with category and accreditation revalidation.
CMP-05	Must	Publish responsive schedules, start lists, results, medal/ranking tables and downloadable reports with approval, correction and version history.
CMP-06	Must	Prevent unpublished/draft or personally sensitive competition data from being exposed; provide approval and embargo controls.
CMP-07	Must	Monitor data feeds, flag stale/failed imports and provide replay, reconciliation and manual fallback procedures.
CMP-08	Should	Provide participant favourites, personalised schedules, change notifications and calendar export.

4.6 COMMUNICATIONS, ADMINISTRATION AND REPORTING

ID	PRIORITY	REQUIREMENT
OPS-01	Must	Provide approved multilingual email/SMS/in-app templates with variables, preview, test send, scheduling, throttling, unsubscribe/transactional classification and delivery status.
OPS-02	Must	Target communications by sport, event, category, grade, venue, team, status, evidence gap, payment state, language, role and incident impact.
OPS-03	Must	Provide role-based dashboards and work queues for registration, sport review, finance, accreditation, helpdesk, competition and executive users.
OPS-04	Must	Provide configurable reports, filters, saved views, scheduled distribution and CSV/XLSX/PDF/API export with access controls and export audit.
OPS-05	Must	Provide a full audit log for authentication, data, configuration, rule, permission, document, financial, communication and operational actions.
OPS-06	Must	Provide case/helpdesk capability or integration that links participant, registration, payment, evidence and communication context without uncontrolled data copying.
OPS-07	Should	Provide consented participant feedback/survey and post-event engagement export.
OPS-08	Must	Allow WMS and authorised OC users to export complete data dictionaries, configuration, records, documents and audit data in usable non-proprietary formats.

5. NON-FUNCTIONAL, DATA, PRIVACY, SECURITY AND ACCESSIBILITY REQUIREMENTS

5.1 ARCHITECTURE, INTEGRATION AND QUALITY

ID	PRIORITY	REQUIREMENT
NFR-01	Must	Use a multi-tier, fault-tolerant hosted architecture with separate production and non-production environments, infrastructure monitoring and controlled deployment.
NFR-02	Must	Expose documented, versioned APIs/webhooks and secure batch exchange; provide sandbox credentials, rate limits, schemas, retry/idempotency behaviour and monitoring.
NFR-03	Must	Meet the capacity envelope in section 1.3 and provide performance/load-test evidence using production-like data and integrations before launch and before the Games.
NFR-04	Must	Use configuration rather than bespoke code for routine sport, fee, rule, quota, content and workflow changes; identify every proposed custom component.
NFR-05	Must	Provide release notes, automated test evidence, dependency/vulnerability management, rollback and WMS-approved change control informed by OC operational impact.
NFR-06	Must	Provide observability across application, infrastructure, API, queue, payment and communication components with synthetic participant-journey monitoring.
NFR-07	Must	Support time zones and daylight-saving correctly, store canonical timestamps, and display event time clearly as Europe/Rome where appropriate.

5.2 PERFORMANCE AND USABILITY

MEASURE	MINIMUM TARGET AND MEASUREMENT BASIS
Participant page response	95th percentile ≤ 2.5 seconds and 99th percentile ≤ 5 seconds for key authenticated pages, measured at the service edge under committed peak load.
Administration response	95th percentile ≤ 3 seconds for normal search, view and save operations excluding explicitly approved long-running reports.
Transactional API	95th percentile ≤ 1.5 seconds for non-third-party synchronous APIs; webhook acknowledgement ≤ 2 seconds with asynchronous processing where appropriate.
Registration consistency	No oversell, duplicate order or orphaned paid registration under concurrency, retry, timeout or payment-callback replay tests.
Search/lookup	Participant and accreditation lookup returns within 2 seconds at the 95th percentile under Games-time load.

5.3 PRIVACY AND DATA PROTECTION

PRV-01 Comply with the EU General Data Protection Regulation (GDPR), applicable Italian law and the documented controller instructions of WMS and/or the OC as allocated in the data-governance schedule. Execute a data processing agreement before processing personal data.

PRV-02 Provide privacy-by-design/default, data minimisation, purpose limitation, configurable notices/consents, lawful-basis records, age-appropriate and accessible notices, retention schedules and data-subject-rights support.

PRV-03 Disclose all hosting/processing locations, subprocessors and international transfer mechanisms. No new subprocessor or processing-country change without required notice and contractual approval rights.

PRV-04 Separate and restrict medical, disability/classification, ID and other sensitive evidence; encrypt in transit and at rest; log access and export; and support granular deletion/retention.

PRV-05 Support access, rectification, restriction, portability and deletion workflows with identity verification, search across all components and documented completion evidence.

PRV-06 On exit, deliver agreed exports and certificates of deletion, including from backups when they reach normal expiry, subject only to documented legal retention.

5.4 INFORMATION SECURITY AND PAYMENT SECURITY

ID	PRIORITY	REQUIREMENT
SEC-01	Must	Maintain an information security management system aligned with ISO/IEC 27001:2022 or equivalent independently assured controls; provide current assurance and remediation summaries under NDA.
SEC-02	Must	Use TLS 1.2+ in transit, strong encryption at rest, managed keys/secrets, secure password storage, privileged-access controls and production access logging.
SEC-03	Must	Provide WAF, DDoS protection, bot/rate controls, secure coding, SAST/DAST/dependency scanning, patching and annual plus pre-Games independent penetration testing.
SEC-04	Must	Remediate critical vulnerabilities before production; critical internet-facing issues within 24 hours or through a WMS-approved compensating control, high issues within 7 days.
SEC-05	Must	Provide centralised, tamper-resistant security logs, time synchronisation, detection/alerting and at least 12 months searchable retention for the contract period unless otherwise agreed.
SEC-06	Must	Operate an incident response plan integrated with WMS and the OC; notify both of a suspected material personal-data or security incident within 2 hours of detection and provide continuous updates.
SEC-07	Must	Use a PCI DSS v4.0.1-compliant payment service model and supply the applicable Attestation of Compliance/responsibility matrix.
SEC-08	Must	Perform background screening and security/privacy training appropriate to personnel with production or sensitive-data access, subject to applicable law.

5.5 ACCESSIBILITY AND INCLUSIVE SERVICE DESIGN

ACS-01 All participant-facing web and mobile journeys, administrator workflows required for assisted service, documents and communications must conform to WCAG 2.2 Level AA and applicable European accessibility requirements.

ACS-02 Accessibility must be tested through automated and manual review, including keyboard-only operation, screen readers, zoom/reflow, focus order/visibility, error identification, accessible authentication, target size and colour contrast.

ACS-03 The participant experience must account for older users and people with changing vision, hearing, dexterity, memory or confidence: plain language, large usable targets, no time pressure without extension, clear progress, save/resume and readily available human assistance.

ACS-04 The bidder must provide a current accessibility conformance report, an issue log with remediation dates, and an accessibility contact. Critical barriers in a core registration path are release blockers.

ACS-05 The Solution must capture accessibility/accommodation needs separately from sport classification, with consent, restricted access and operationally usable reporting.

5.6 DATA OWNERSHIP, RESIDENCY, RETENTION AND PORTABILITY

DAT-01 All event data, participant records, configuration, audit data and WMS/OC-created content are owned or controlled by WMS and/or the OC as allocated in the contract and data-governance schedule. The Supplier receives only the rights required to perform the contract.

DAT-02 Production data should be hosted and backed up in the EEA unless WMS approves another location and transfer mechanism in writing after consultation with the OC and completion of the required data-protection assessment.

DAT-03 The Supplier must provide a data model and data dictionary, record lineage, export specifications, document archive mapping and reconciliation totals.

DAT-04 No Supplier analytics, model training, benchmarking, advertising or cross-customer use of identifiable event data is permitted without explicit written authorisation and a lawful basis.

6. DELIVERY APPROACH, MILESTONES AND ACCEPTANCE

6.1 REQUIRED DELIVERY MODEL

The bidder must propose a named delivery team and a plan that protects the 17 September 2026 launch. The first release must use proven capabilities and the smallest safe launch scope; later phases may add competition and Games-time modules without destabilising registration.

1. Named executive sponsor, programme manager, solution lead, Masters sport/rules lead, data/integration lead, security/privacy lead, service delivery manager and Games-time software-service lead.
2. Integrated plan with WMS/OC dependencies, decision deadlines, resource loading, critical path, risks, assumptions, environments and acceptance evidence.
3. Daily mobilisation and launch control until stable; weekly delivery governance thereafter; enhanced readiness governance beginning 120 days before the Games.
4. Single RAID log, decision log, configuration register, requirements traceability matrix and release plan accessible to WMS and the OC.

6.2 PROCUREMENT AND LAUNCH TIMETABLE

BIDDER CONFIRMATION REQUIRED Each bidder must confirm every date below, name any missing dependency and provide a credible fallback. An unqualified inability to launch on 17 September 2026 is a material non-compliance.

MILESTONE	TARGET DATE	MINIMUM OUTCOME
RFP issued	27 Aug 2026	Tender opens.
Questions due	31 Aug 2026, 12:00 CEST	Consolidated bidder questions.
WMS answers	1 Sep 2026	Common written response.
Proposals due	4 Sep 2026, 12:00 CEST	Complete response, price, SLA and implementation plan.
Demos / due diligence	7-8 Sep 2026	Scripted scenarios, security and delivery validation.
Preferred bidder / award target	9 Sep 2026	Subject to approvals and contract.
Contract and mobilisation	9-10 Sep 2026	Team, environments, data, plan and decision cadence mobilised.
Launch UAT and readiness gate	15-16 Sep 2026	Core registration accepted; cutover and rollback approved.
Registration production launch	17 Sep 2026	Live, monitored, supported participant registration.
Stabilisation complete	30 Sep 2026	Priority launch issues closed; operational baseline accepted.

6.3 POST-LAUNCH DELIVERY PHASES

PHASE	TARGET PERIOD	REQUIRED DELIVERABLES / GATE
A. Core launch	Award-17 Sep 2026	Identity, sport selection, core rules, payment, confirmations, privacy/security, support and monitoring.
B. Stabilise and complete registration	Sep-Dec 2026	Full team/partner, evidence, waitlist, finance, admin, reports, pre-registration migration and agreed integrations.
C. Competition and accreditation readiness	Jan-Jun 2027	Final sport configurations, accreditation, competition interfaces, results publication, data rehearsals and venue operating model.

PHASE	TARGET PERIOD	REQUIRED DELIVERABLES / GATE
D. Operational readiness	Jul-16 Sep 2027	Dress rehearsals, capacity/security/DR tests, training, runbooks, technical-support coverage plan, change freeze and go-live acceptance.
E. OC-led Games operations	17-26 Sep 2027	The OC runs the event; Supplier provides 24/7 software-service command, incident/change control, daily reporting and integration monitoring with the agreed remote/on-site technical coverage.
F. Closure and exit	27 Sep-31 Dec 2027	Reconciliation, reports, archive/export, participant communications, lessons, deletion/retention and transition.

6.4 LAUNCH ACCEPTANCE CRITERIA

1. All launch-scope mandatory requirements traced to evidence and accepted in UAT; no open Severity 1 or Severity 2 defect and no unapproved critical/high security finding.
2. English and Italian registration journeys complete successfully across supported devices, including accessible keyboard and screen-reader tests.
3. Age/category, team, price, quota, document and payment test packs pass against OC-approved sport configurations and boundary dates.
4. Payment authorise/capture/fail/retry/refund/duplicate-callback cases reconcile correctly; receipts and finance exports balance.
5. Pre-registration migration/claim flow reconciles record counts and duplicates, with rollback and support scripts approved.
6. Load test meets committed capacity and response targets; monitoring detects failed registration, payment and communication synthetic journeys.
7. Backup restore and launch rollback are demonstrated; contact tree, incident bridge, status communications, support rota and runbooks are signed off.
8. WMS and the OC complete a documented go/no-go decision: WMS accepts the software service and the OC confirms operational readiness. Conditional acceptance must list owner, deadline, workaround and risk.

6.5 OPERATIONS-READY GATE BEFORE THE GAMES

No later than 30 days before the Games, and again before the Games change freeze, the Supplier must evidence:

1. Final production configuration and data reconciliation for sports, venues, schedules, entitlements, users and integrations.
2. Successful end-to-end dress rehearsal across registration change, accreditation, roster export, results import/correction, targeted communication and management reporting.
3. Successful peak-load, failover, backup-restore, cyber incident and loss-of-integration exercises, with actions closed or formally accepted.
4. Approved service map, monitoring dashboards, alert thresholds, escalation tree, RACI, duty roster, command-centre plan and field-support deployment for Como, Lecco and Varese.
5. Approved standard operating procedures and manual/offline fallbacks for payment outage, venue connectivity loss, credential lookup/print, late roster change, results-feed failure and mass communication.
6. Training and competency evidence for OC administrators, helpdesk, accreditation, finance, sport and venue users; quick-reference guides available in English and Italian.
7. Approved change freeze, emergency-change process, rollback plan, communications templates and daily service reporting format.

7. OPERATIONS-READY SERVICE-LEVEL AGREEMENT

7.1 SLA PURPOSE AND OPERATING PRINCIPLE

The SLA is a minimum contractual service schedule, not a statement of intent. It applies to the end-to-end Core Service, including Supplier-managed components and subcontractors. The Supplier remains the single escalation point and may not stop SLA clocks while coordinating a third party.

OPERATIONS-READY SLA A software service is operations-ready only when availability targets are backed by named Supplier responders, monitoring, incident authority, tested recovery, documented OC workarounds, WMS/OC communications and measurable reporting. A software uptime promise alone is insufficient.

7.2 SERVICE WINDOWS AND PROTECTED PERIODS

PERIOD	SUPPORT COVERAGE	PROTECTED-WINDOW REQUIREMENTS
Mobilisation and pre-launch	24×7 Severity 1; 08:00-18:00 CEST business days for Severity 2-4.	Daily launch control from contract signature until 7 days after launch.
Registration live-standard	24×7 Severity 1; extended coverage for published campaigns/deadlines; business-hours Severity 2-4.	First 96 hours after launch and final 72 hours before each major entry/payment deadline.
Games readiness	24×7 Severity 1 and Severity 2 from 30 days before Games; extended hours for all severities.	Dress rehearsals, accreditation opening and approved high-volume data loads.
Games mode	24×7 all severities with software-service command and agreed remote/on-site technical coverage.	14-29 Sep 2027, or the WMS-approved period covering accreditation, Games and close-down.
Post-Games	24×7 Severity 1; business-hours Severity 2-4 until closure.	Financial reconciliation, results correction and final data export deadlines.

7.3 AVAILABILITY SERVICE LEVELS

SERVICE	STANDARD TARGET	PROTECTED / GAMES TARGET
Participant registration, account and payment orchestration	≥99.95% per calendar month	≥99.99% per calendar month; no planned maintenance
Administrator, eligibility, team and finance workflows	≥99.90% per calendar month	≥99.95% per calendar month
Accreditation lookup/issue interfaces	≥99.90% when enabled	≥99.99% during published operating hours
Schedule/results publication and Supplier-managed interfaces	≥99.90% when enabled	≥99.95% during Games mode
APIs/webhooks essential to a Core Service	Same target as the dependent Core Service	Same target as the dependent Core Service

Availability = (Scheduled Service Minutes - Unavailable Minutes) / Scheduled Service Minutes x 100. Unavailable Minutes begin when the Supplier's monitoring detects the failure or WMS/the OC reports it, whichever is earlier. Partial failure, severe degradation or a failed critical transaction path counts proportionately or fully where the intended outcome cannot be completed. Exclusions are limited to WMS-approved maintenance outside Protected Windows and force majeure that the Supplier could not reasonably mitigate; Supplier/subcontractor failure, capacity shortage, certificate expiry, deployment error and DDoS are not automatic exclusions.

7.4 INCIDENT SEVERITY AND SERVICE TARGETS

SEVERITY	DEFINITION / EXAMPLES	ACKNOWLEDGE	RESTORE OR SAFE WORKAROUND	UPDATE CADENCE
S1 Critical	Core Service unavailable; payment integrity risk; data loss/corruption; widespread accreditation blockage; material security/privacy incident; no viable workaround.	5 min Protected / Games; 15 min otherwise	30 min Protected / Games; 60 min otherwise	Every 15 min
S2 Major	Material degradation or partial outage affecting many users, a sport/venue, financial close or deadline; workaround exists but is operationally costly.	15 min Protected / Games; 30 min otherwise	2 h Protected / Games; 4 h otherwise	Every 30 min
S3 Minor	Limited impact, non-critical function degraded, small user group affected; reasonable workaround available.	4 business h; 30 min in Games mode	2 business days; same shift in Games mode	Daily / shift as agreed
S4 Request	Information, access, configuration or low-impact improvement request.	1 business day; 2 h in Games mode	Agreed fulfilment target / backlog	At status change

Acknowledge means a qualified responder has accepted ownership and joined the agreed channel. Restore means the affected business outcome can be completed safely, data is consistent and the workaround is documented. Closure requires WMS service-owner confirmation, informed by OC operational validation, or evidence that service and reconciliation are complete. SLA clocks run continuously during the applicable service window.

7.5 INCIDENT, PROBLEM AND COMMUNICATIONS MANAGEMENT

1. Provide one 24×7 telephone and electronic escalation route, automated ticket acknowledgement, named incident commander for S1/S2 and a shared bridge/channel during active incidents.
2. Proactively detect and open S1/S2 incidents. The OC must not be required to prove an outage before response begins.
3. Issue plain-language participant/operational updates approved through the incident plan; maintain an external status page or agreed equivalent that does not disclose security-sensitive detail.
4. Provide an initial incident report within 24 hours after restoration and a root-cause analysis within 5 business days for S1 and 10 business days for S2, including timeline, data/financial reconciliation, cause, contributing controls, corrective actions, owners and dates.
5. Track recurring incidents as problems. Three similar S2 incidents in 30 days may be reclassified as an S1 problem requiring an executive corrective plan.

7.6 BACKUP, CONTINUITY AND DISASTER RECOVERY

CONTROL	MINIMUM COMMITMENT
Transactional recovery point	RPO ≤ 5 minutes for registration, payment status, team/roster, eligibility decision and accreditation transaction data.
Core Service recovery time	RTO ≤ 60 minutes normally and ≤ 30 minutes during Protected/Games Windows for a regional/site-level service failure.
Backups	Encrypted point-in-time recovery plus daily backups; immutable or logically isolated copy; at least 35-day operational retention unless otherwise agreed.
Restore testing	Quarterly sample restore and reconciliation; full pre-Games restore/failover exercise completed at least 60 days before Games mode.
Business continuity	Documented manual/offline procedures, controlled data capture, reconciliation and participant communication for each critical venue/service dependency.
Disaster recovery evidence	Architecture, dependencies, contact tree, runbook, latest test results, gaps and remediation dates available to WMS and the OC.

7.7 CHANGE, MAINTENANCE AND RELEASE CONTROLS

1. Standard planned maintenance requires at least 10 business days' notice, WMS approval after OC operational review and a rollback plan; it must not occur in a Protected Window.
2. A registration-launch freeze begins 72 hours before launch. A Games freeze begins 30 days before Games mode for material changes and 14 days before for all non-essential production changes.
3. Emergency changes require incident authority, risk/test evidence, rollback, post-change validation and next-business-day review.
4. Changes to sport rules, fees, eligibility, payment, privacy notices, roles or retention require named OC approval and a before/after audit record.

7.8 SERVICE REPORTING AND GOVERNANCE

1. Live operational dashboard for availability, latency, error rate, queues, payment callbacks, message delivery, integrations, incidents and capacity headroom.
2. Monthly service report within 5 business days covering SLA calculation, incidents/problems, capacity, security/vulnerability status, changes, backups/restores, support volumes, trends, service credits and improvement actions.
3. Daily launch and Games-mode service report covering previous 24 hours, open risk, incidents, changes, data reconciliation, forecast peak and staffing.
4. Weekly service review in mobilisation/readiness; monthly review in steady state; daily operational review in Games mode; quarterly executive review or on demand after S1.

7.9 SERVICE CREDITS AND CHRONIC FAILURE

Bidders must accept the following minimum remedy model or state a clear alternative. Credits are calculated against the monthly recurring Core Service and support fees for the affected service, capped at 25% per month:

FAILURE	MINIMUM CREDIT / REMEDY
Availability up to 0.10 percentage point below target	5% of affected monthly fee.
0.11-0.50 point below target	10% of affected monthly fee.
More than 0.50 point below target	20% of affected monthly fee.
Missed S1 restoration target	2% of affected monthly fee for each commenced 30-minute interval, capped within the monthly total.
Protected-window repeat or chronic failure	Mandatory executive remediation plan; WMS may require additional testing, service staffing or termination/transition rights for repeated material breach, after consultation with the OC.

Credits do not excuse performance and are not the exclusive remedy for confidentiality, data protection, security, fraud, intellectual-property breach, gross negligence, wilful misconduct, indemnified claims or termination rights. Contract language will prevail.

8. COMMERCIAL AND CONTRACTUAL REQUIREMENTS

8.1 PRICING BASIS

The proposal must provide a complete, fixed and transparent total cost for the Como Lake 2027 service. Price the expected case of 14,000 paid athletes and include committed unit rates/caps for 7,500 and 17,500 scenarios. No global World Masters Sport platform tiering is requested.

1. One-time mobilisation, configuration, migration, integration, testing, launch and training.
2. Recurring platform, hosting, storage, environments, licences, monitoring, support and security costs through contract exit.

3. Transaction or participant fees; payment gateway/acquirer fees; SMS/email; document storage; identity checks; tax and currency costs.
4. Accreditation, competition/results and optional modules; third-party fees and dependencies.
5. Games-time software-service command, agreed remote/on-site technical support, travel, accommodation, equipment and extended support where proposed.
6. Change-control rates and included capacity; service credits; exit, final export and deletion.
7. All assumptions, minimum commitments, inflation/indexation, taxes, pass-through items and circumstances that may increase price.

8.2 MINIMUM CONTRACT POSITIONS

CON-01 WMS and/or OC ownership/control of event data and configuration as allocated in the data-governance schedule; perpetual rights to WMS/OC-created content and exports; no lien over data.

CON-02 Data processing agreement, confidentiality, subprocessor flow-down, security schedule, audit/evidence rights and incident cooperation.

CON-03 Supplier responsibility for subcontractors, licences and intellectual-property claims; continuity if a component supplier fails.

CON-04 Appropriate cyber, professional indemnity/errors and omissions, and public liability insurance, with limits stated by the bidder.

CON-05 Acceptance, warranty, change control, SLA/service credits, delay remedies, termination for cause/chronic failure and step-in/transition assistance.

CON-06 No use of WMS, OC or participant names, marks, stories, data or event association for marketing without WMS written approval and any additional OC approval required by the event agreements.

CON-07 Complete exit assistance, data/document/configuration/audit export, knowledge transfer, revocation of access and deletion certification.

CON-08 Governing law and jurisdiction: the contract will be governed by Swiss law, with exclusive jurisdiction of the courts of Lausanne, Switzerland, unless otherwise agreed in the executed contract.

8.3 BID ASSUMPTIONS AND EXCEPTIONS

A bidder must include one consolidated assumptions, dependencies and exceptions schedule. Silence means compliance. Marketing literature, click-wrap terms or web policies do not override the proposal or contract unless expressly incorporated.

9. EVALUATION, DEMONSTRATIONS AND AWARD

9.1 MANDATORY PASS/FAIL GATES

1. Unqualified commitment to an operations-ready registration launch on 17 September 2026.
2. Production-proven platform and delivery model; no unbuilt critical-path feature concealed as standard capability.
3. Ability to model the Masters rule patterns in section 3 and demonstrate representative scenarios.
4. Acceptance of GDPR processor obligations, security due diligence, PCI-compliant payment model, accessibility remediation and the operations-ready SLA (or clearly acceptable alternatives).
5. Single prime responsibility, named delivery team and transparent subcontractor/hosting model.
6. Complete pricing and agreement to portable data/configuration export and transition.

9.2 WEIGHTED EVALUATION

CRITERION	WEIGHT
Rapid readiness and evidence of safe 17 September 2026 launch	20%

CRITERION	WEIGHT
Masters sport rules, registration, teams, eligibility and participant experience	20%
Operations, support, SLA, continuity and Games-time model	15%
Privacy, security, payment security and accessibility	15%
Architecture, integration, data, performance and scalability	10%
Implementation approach, people, training and governance	10%
Total cost, pricing transparency and contractual value	10%

The pass/fail gates in section 9.1 apply before weighted scoring. Price will be scored relative to the lowest priced compliant proposal; all other criteria will be scored against the evidence standards set out in this RFP.

9.3 SCRIPTED DEMONSTRATION

Shortlisted bidders should expect to demonstrate live, using an existing environment rather than slides:

1. A mature swimmer registers for individual events; the category is calculated against 31 December 2027; medical evidence and payment are completed accessibly in English/Italian.
2. A basketball captain builds a team; adding a younger player recalculates the team category, capacity and price with a clear warning and audit.
3. A rowing crew is categorised by average age excluding the coxswain; a substitution is validated without corrupting the original entry.
4. A judo entry validates age, weight, federation membership and minimum belt/grade; an exception is reviewed with dual approval.
5. A tennis participant selects different allowed grades by event; a doubles partner invitation and youngest-player category rule are applied.
6. A para-swimming entry captures sport class evidence with restricted access and produces the correct competition export without exposing medical data.
7. A quota fills, a participant joins a waitlist, an offer expires, payment retries safely and financial/registration records reconcile.
8. The operations team detects a failed payment or results interface, opens an incident, switches to the documented workaround and reports SLA evidence.

9.4 DUE DILIGENCE

WMS may request reference calls, architecture/security review, penetration/accessibility reports, data-flow and subprocessor review, service-desk evidence, financial standing, insurance, product roadmap, contract mark-up and a proof-of-configuration exercise. Any award remains subject to approvals and an executed contract.

10. BID RESPONSE AND SUBMISSION INSTRUCTIONS

10.1 REQUIRED RESPONSE STRUCTURE

1. Executive commitment: launch confirmation, solution summary, key differentiators, assumptions and requested decisions.
2. Company, ownership, financial standing, locations, insurance, named contacts and subcontractors.
3. Solution architecture, environments, hosting/processing locations, product roadmap and standard-versus-custom map.
4. Completed compliance matrix and Masters rule response, with screenshots/evidence where useful.
5. Implementation, migration, integration, testing, launch, training, Games-time and exit plans with named team and effort.

6. Operations-ready SLA response, support model, staffing/roster, service evidence, DR and incident examples.
7. Security, privacy, PCI and accessibility schedules, assurance evidence and open remediation items.
8. Complete commercial schedule, contract exceptions and three comparable references, preferably including a multi-sport event above 5,000 participants and an EU/EEA deployment.

10.2 SUBMISSION

REQUIREMENT	INSTRUCTION
Deadline	4 September 2026 at 12:00 CEST, unless amended in writing.
Method	Electronic submission by email to Jens V. Holm, CEO, World Masters Sport: jholm@worldmasterssport.com.
Files	One searchable PDF response, completed editable compliance/pricing schedules, and separate confidential assurance evidence if required.
Subject line	Como Lake 2027 Technology RFP - [Bidder legal name].
Validity	Minimum 30 days from the deadline.
Questions	Submit a consolidated, numbered question log to jholm@worldmasterssport.com by 31 August 2026 at 12:00 CEST.

APPENDIX A. REQUIRED COMPLIANCE AND PRICING SCHEDULES

A1. COMPLIANCE SCHEDULE

Return an editable schedule containing every requirement ID and the following columns:

COLUMN	REQUIRED CONTENT
Requirement ID	Exact ID from this RFP.
Response	Comply-standard / configuration / third party; Partial; Roadmap; Not available.
Evidence	Module, screen, API, document or demonstration reference.
Launch availability	Available 17 Sep 2026 / later date.
Dependency	WMS/OC decision, data or integration dependency; subcontractor or other dependency.
Cost	Included or exact schedule line.
Qualification	Concise limitation, workaround, custom work or deviation.

A2. PRICING SCHEDULE

PRICE COMPONENT	ONE-TIME	RECURRING / UNIT	14,000-ATHLETE TOTAL	NOTES / ASSUMPTIONS
Mobilisation and core launch				
Platform, hosting and environments				
Registration/team/eligibility modules				
Payment and finance				
Accreditation				

PRICE COMPONENT	ONE-TIME	RECURRING / UNIT	14,000-ATHLETE TOTAL	NOTES / ASSUMPTIONS
Competition/results integrations				
Email/SMS/identity/document services				
Training and documentation				
Games-time software support and travel				
Exit/export/deletion				
Optional modules				
Total excluding VAT				

A3. REFERENCES

For each reference provide event/client, dates, sport count, participant count, regions/venues, modules, bidder role, integrations, SLA/Games-time support, implementation lead time, contact details and permission to contact.

APPENDIX B. SLA RESPONSE SCHEDULE

Bidders must reproduce each SLA target and state Accepted / Enhanced / Exception. An exception must include the proposed target, operational impact and price consequence.

SLA AREA	BIDDER RESPONSE REQUIRED
Service map	Components, owners, dependencies, support hours and system of record.
Availability	Target by service and period; measurement point; monitoring evidence; exclusions.
Performance/capacity	Committed volumes, response percentiles, load model, queue/bot protection and last comparable test.
Incident targets	Acknowledge, restore, update and RCA by severity and period; escalation contacts.
People	Named/role-based support model, on-call rota, language, location and agreed Games-time remote/on-site technical coverage.
Continuity	RPO/RTO, backup design, DR location, last test, manual fallbacks and reconciliation.
Security incident	Detection, WMS/OC notification, forensics, legal/regulatory cooperation and evidence preservation.
Reporting/governance	Dashboards, monthly/daily reports, reviews, problem management and continual improvement.
Credits/remedies	Acceptance or alternative credit and chronic-failure regime.

APPENDIX C. RESEARCH BASIS AND GOVERNING REFERENCES

This RFP uses public information available on 27 August 2026 to describe the event and illustrate Masters sport patterns. Public information is evolving. The executed contract, WMS/OC-approved rule register and final sport guides will govern configuration and acceptance.

C1. EVENT AND MASTERS SPORT SOURCES

[1] World Masters Sport - Como Lake 2027 event overview - event dates and Masters event context

[2] Open Masters Games Como Lake 2027 - official sport programme - current public list of sports

[3] Open Masters Games Como Lake 2027 - what are the Masters Games - 30+ positioning, no upper age limit and individual participation concept

[4] Comune di Varese - Open Masters Games Como Lake 2027 - public planning statement for sports, para disciplines, venues and competition events

[5] Regione Lombardia - countdown to Open Masters 2027 - public planning estimate of approximately 14,000 athletes

[6] Como Lake 2027 Golf Sport Information Guide - reference-date, age-band, handicap and category-combination examples

[7] Como Lake 2027 Swimming Sport Information Guide - individual/relay age and para-classification examples

[8] Como Lake 2027 Rowing Sport Information Guide - crew-average-age and substitute examples

[9] Como Lake 2027 Basketball Sport Information Guide - youngest-player team category and proficiency-grade examples

[10] Como Lake 2027 Tennis Sport Information Guide - doubles age, grade-by-event and entry-limit examples

[11] Como Lake 2027 Judo Sport Information Guide - age, weight, licence, belt and evidence examples

C2. COMPLIANCE AND SERVICE-DESIGN REFERENCES

[12] EUR-Lex - General Data Protection Regulation (EU) 2016/679 - data protection, processor security and breach obligations

[13] W3C - Web Content Accessibility Guidelines (WCAG) 2.2 - Level AA accessibility basis

[14] European Commission - European Accessibility Act overview - EU accessibility context for services including e-commerce and payments

[15] PCI Security Standards Council - PCI DSS v4.0.1 - current payment-card security standard referenced by this RFP

C3. RULE AUTHORITY AND CHANGE CONTROL

> **CONTRACTUAL RULE HIERARCHY** Final WMS/OC-approved sport guides and rule register prevail over examples in this RFP. Where the website, guide and federation rule differ, the Supplier must not guess: it must raise a controlled decision, record the approved interpretation and version the configuration.

END OF RFP
